

GigaReader – A multi-gigabyte text file reader.

Notes:

- 1) GigaReader cannot and will not make changes to your text files.
- 2) When GigaReader opens a file the application will create two text files in the %Temp%\GigaReader folder. The created files consist of a line index and a metadata json file about the text file being opened.
- 3) Clipboard operations support up to 1 million lines.
- 4) Mono-spaced fonts are supported.

Please enjoy!
